Heading towards the end of 2023, the San Francisco retail sector is looking back at a difficult year, during which its overall operating performance has been held back by the deterioration of Union Square and the neighboring areas in downtown San Francisco.

Traditionally home to major department stores and highend fashion retailers, the vitality of Union Square has declined in recent years after visitor traffic fell during the extensive pandemic lockdowns, and has stagnated amid the subsequent drawn-out return of residents, office workers, and tourists. Additional well-publicized problems related to crime, homelessness, and drug use also plague the neighborhood, keeping shoppers away and leading many major retailers to close stores.

In May 2023, Nordstrom announced the closure of both its 300,000-SF department store in the San Francisco Westfield Center and its nearby Nordstrom Rack outlet. A few weeks later, the owner of the Westfield Center halted payments on its \$560 million loan and began the process of transferring title to the lender.

Thus, San Francisco's performance lags most other metros across the nation. Retail vacancy in San Francisco was one of the lowest in the nation in 2019, but it is now one of the nation's highest, at 5.9%. Similarly, average market rent, which increased at an annual rate of 3.1% nationally over the past 12 months, increased by just -0.8% in San Francisco.

At the national level, despite longstanding concerns of a softening economy and eventual pullback in consumer spending, U.S. retail space markets have remained resilient through the first three quarters of the year thanks to steady demand from a diverse array of sectors, a significant pullback in store closures, and minimal new supply. Absorption is positive, led by general retail and neighborhood centers. Quick service restaurant (QSR) tenants are the main takers of smaller spaces, while dollar stores, fitness and experiential retailers are showing the greatest interest in medium and large spaces.

The structure of San Francisco's retail market reflects both the high-income levels of its population and the supply-constrained nature of its densely populated geography. The City of San Francisco itself is characterized by general retailing along popular urban strips in heavily populated neighborhoods, such as Chestnut Street in the Marina District, Valencia Street in The Mission, and Hayes Street in Hayes Valley. These neighborhoods comprise eclectic mixes of eateries and independent boutiques and are typically subject to ordinances that restrict the presence of chain stores. In contrast to the current situation in downtown and Union Square, these retail zones are generally active and vibrant, with a healthy influx of new stores and restaurants.

In the outer parts of San Francisco and in San Mateo County, the retail structure has a greater representation of malls and shopping centers. The main regional malls include Stonestown Galleria in San Francisco, the Serramonte Center in Daly City, and Hillsdale Mall in San Mateo. Retail performance in San Mateo has been stable, with both vacancy and rent growth generally flat over the past year.

On the supply side, the market has a low amount of new construction, partly because of high costs, limited land availability and restrictive planning policies, but also because of weak demand.

In the investment market, transaction activity remains low amid the persistence of high interest rates and concerns about the viability of some San Francisco locations. Financial distress related to imminent loan maturities is also a growing concern. In downtown San Francisco, both the Westfield Center and the building formerly occupied by the Saks Fifth Avenue Men's Store have been transferred to lender ownership this year. Several other retail properties have loan maturities within the next two years, with the largest being Stonestown Galleria, where the owners are currently negotiating an extension or other solution to a maturing \$165.5 million loan.

As of the first quarter, San Francisco continues to see growing vacancy, with local centers and suburban locations faring better than downtown.

Union Square's historic position as the preeminent retail destination in Northern California has deteriorated in recent years, reflected by the closure of many important retailers, including department stores and mainstream chain stores. In May, Nordstrom closed both its department store in the Westfield San Francisco Centre and its nearby Nordstrom Rack store. Soon after, the owner of the San Francisco Westfield Centre walked away, transferring ownership of the mall to the lender. Nordstrom has shifted its focus away from downtowns to suburban locations, and is planning to open a Rack store at Bridgepointe Shopping Center in San Mateo.

Other retailers to close stores in Union Square include Barneys New York, Forever 21, Gap, H&M, Uniqlo, and Abercrombie & Fitch. In January 2023, the 30,000-SF flagship Banana Republic store was closed as the retailer moved to a smaller 9,250-SF space. Elsewhere in San Francisco, other retailers, including Walgreens and Starbucks, have cited rising crime as a reason for shuttering downtown stores.

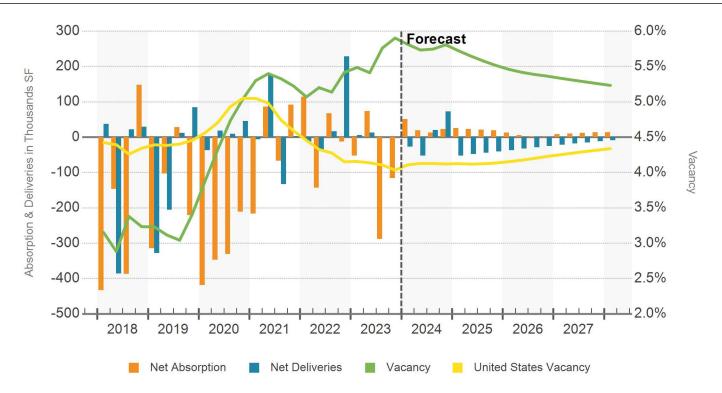

In the past few months, the Union Square narrative has

taken a more positive turn with the opening of a small format Ikea store at 945 Market St. It is hoped that Ikea will be a catalyst to stem the loss of more retailers and attract new ones to the downtown area. Ikea's Ingka Centres purchased the property for \$198 million in 20Q3. The Ikea store is part of a larger project that will also include a gourmet food hall and an Industrious coworking facility. Another positive point for downtown is the continued presence of a critical mass of high-end fashion retailers, centered on Grant Street and Post Street. These designer boutiques have maintained, and in some cases expanded, their presence in recent years, despite the drop in overseas tourism, which provides a large share of their income.

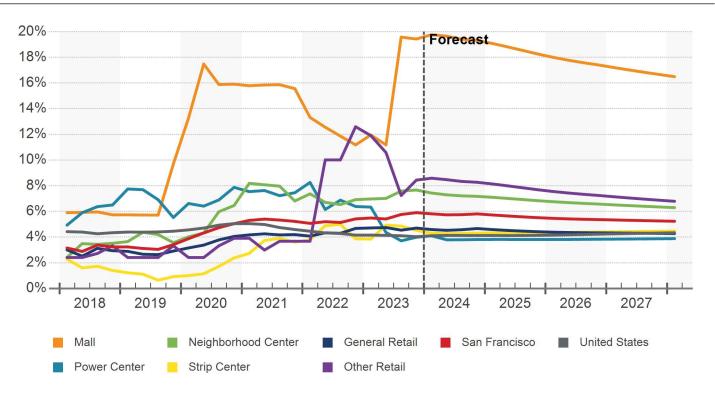

The market's largest mall, Stonestown Galleria, has seen major changes in recent years. The owners have replaced Macy's and Nordstrom with Target, Whole Foods, and Sports Basement, and it is currently planning to redevelop the mall as a mixed-use urban village, with the addition of 3,000 homes.

San Francisco's smaller retail centers and urban main street shopping districts have generally performed well in recent years, benefitting from the shift in working patterns that has led to people spending more time shopping closer to home in their local neighborhoods.

<sup>\*</sup>Renewal

The recent period has been one of positive rent growth across most of the nation, with landlords benefitting from low availability levels and robust consumer spending. However, in San Francisco, upward movement in retail rents has been more elusive. As of the first quarter, annual rent growth, which currently stands at 3.1% nationally, was negative by -0.8% in San Francisco.

This trend is widespread across San Francisco, with all submarkets experiencing anemic rent growth in 2021 and 2022. General retailing, which is the largest category in San Francisco and accounts for more than 75% of the retail market, lags the other subtypes, with negative change of -0.9% over the past year.

Across most U.S. markets, brick-and-mortar retailers benefited from a post-pandemic surge in spending by consumers, as pent-up demand during the pandemic and government stimulus funds combined to fuel increased consumer spending on retail goods and services. In San Francisco, however, this did not

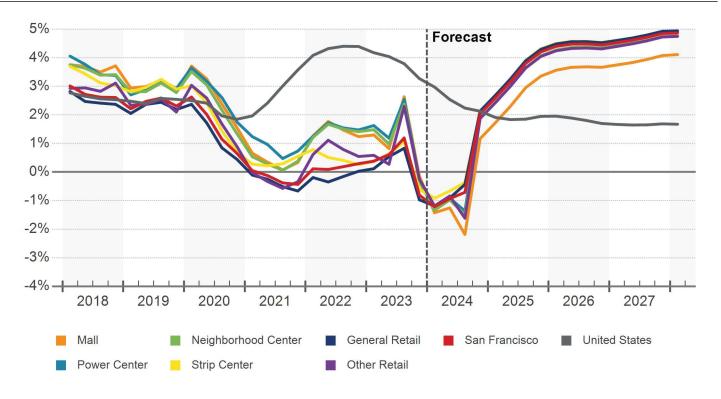

translate into rent growth, partly because rents are already among the highest in the nation, with average asking rent currently at \$43.00/SF. This compares to the U.S. average of \$25.00/SF.

Another major drag on rents for San Francisco is the recent reduction in the size of the retail spending market, caused by a substantial fall in the resident population. According to estimates from the California Department of Finance, the population of San Francisco at the start of 2023 had fallen by around 90,000 people over the past five years.

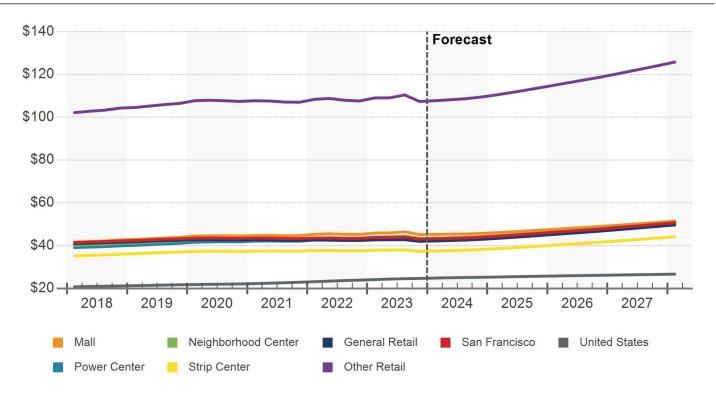

An even bigger relative fall in daytime commuters has caused distress for retailers in downtown San Francisco, where dozens of retail and restaurant businesses have shuttered in the past three years.

These trends have curtailed rent growth and are likely to continue to act as a constraint that will prevent many landlords from raising rents in the next few years.

#### MARKET ASKING RENT GROWTH (YOY)

#### MARKET ASKING RENT PER SQUARE FEET

As of the first quarter, construction activity in San Francisco is at a historically low level. The construction pipeline consists of a small number of mixed-use redevelopment projects and a single Safeway store, with a total volume of 220,000 SF underway. This compares to the five-year average of 390,000 SF.

Several unfavorable supply and demand trends have quashed retail construction activity in San Francisco. For many years, a lack of developable sites and restrictive planning policies have limited the volume of new retail development. More recently, population decline has reduced demand and diminished the viability of new retail projects. Moreover, in the past year, the persistence of high interest rates has raised the cost of construction financing, thereby presenting an additional challenge to the feasibility of retail developments.

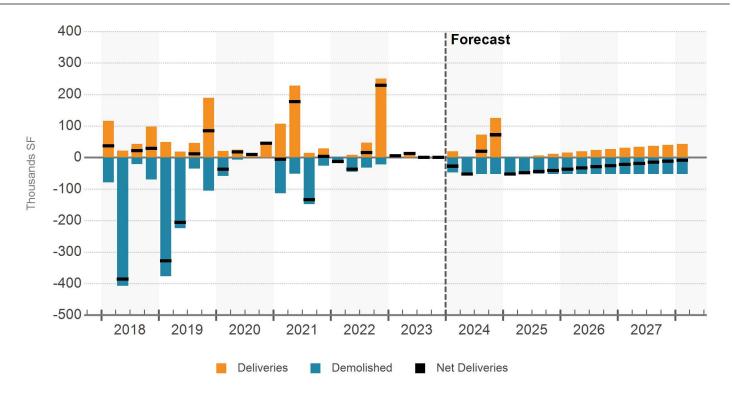

Over the longer term, the stock of shopping center space is falling as other uses become relatively more valuable. In Union Square, the renovation of the old Macy's Men's Store at 100 Stockton St. involves most of the 243,000-SF project being repositioned as office space, as evidenced by the 23Q4 opening of a 65,000-SF Convene coworking facility. Another building that was

previously part of Macy's Union Square complex, at 233 Geary St., was sold for redevelopment in 2020. Plans for the site call for street level retail, several floors of office space, and residential condominiums on the upper levels. Similarly, the proposals for 48 Stockton St., previously occupied by Barneys New York, include a change of use to office for the upper four floors.

In the San Bruno/Millbrae Submarket, the Shops at Tanforan, a 50-year-old mall that was previously anchored by JCPenney and Sears, which had struggled for many years, was sold in 22Q1 for \$82.7 million, or \$142/SF. The buyer was Alexandria Real Estate, which plans to develop a mixed-use biotechnology campus on the site.

Redevelopment of brownfield sites is an additional source of new retail space; however, these projects tend to focus on other uses, such as apartments and office, with a smaller component of ancillary retail. For example, the Gateway at Millbrae Station is a large mixed-use project that includes residences, affordable housing, offices, and a hotel, together with 44,000 SF of street-level retail. The apartment buildings have recently completed, and the retail space is in lease-up.

Over the past few quarters, the transaction markets have experienced a significant slowdown, tapping the brakes on sales activity. Faced with elevated interest rates and a slowdown in consumer spending, capital sources in the retail sector are undergoing a shift. Institutional and REIT investors have adopted a more-cautious stance, pulling back on acquisition activity, thereby allowing private investors greater access to investment opportunities.

Retail investment in San Francisco typically comprises a large number of small deals, with almost all transactions involving individual retail stores in the general retail subtype. Total sales volume in the past year was \$322 million across 130 transactions. This is a notable pullback from the 10-year annual average volume of \$914 million and 400 transactions.

Most recent sales are smaller 2 Star and 3 Star buildings, picked up by local private investors and owner/users. The average transaction price for sales that closed over the past year was \$400/SF, which is somewhat below the five-year average of \$550/SF. In general, the resilience of the single-tenant net-lease space stands out. This niche attracts private capital, primarily composed of cash buyers with long-term investment horizons. Motivated by tax deferral and estate

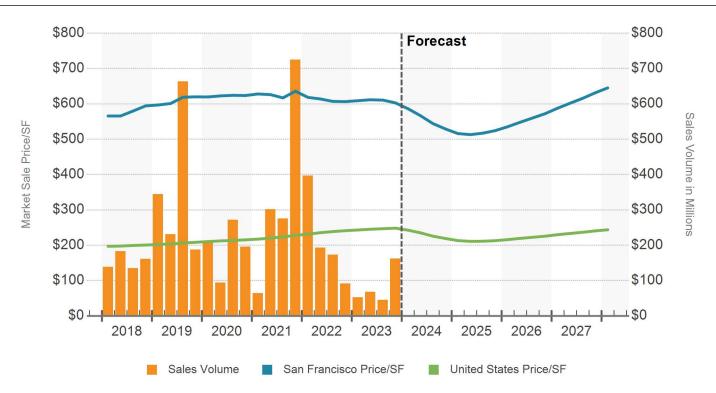

planning factors, these investors have experienced relatively modest increases of 25-50 basis points in cap rates over the past year. The reaction to higher interest rates has been delayed in this space due to the lesser use of debt by trade buyers.

In downtown San Francisco, persistent levels of high vacancy have started to cause distress for over-leveraged owners. Most notably, the owner of the Westfield San Francisco Center elected to walk away from the property in 23Q2, transferring ownership of the mall, which had previously been valued at \$1.2 billion, to the lender of its \$560 million mortgage.

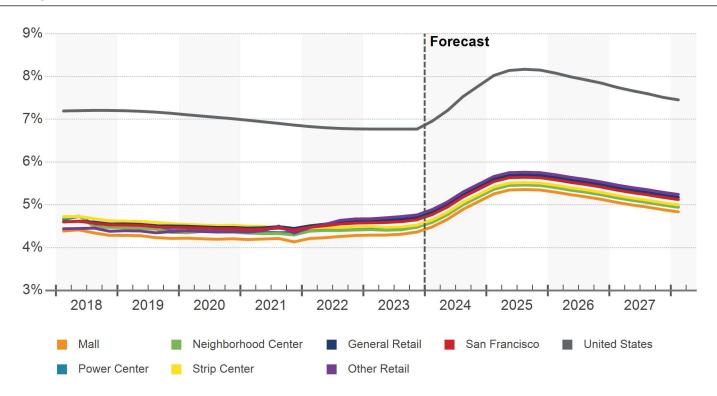

Moreover, in August 2023, the owner of 220 Post St., which has stood empty since it was vacated by Saks Fifth Avenue in 2020, transferred the deed in lieu of foreclosure to the lender. The property had been acquired for \$73 million in 2016, and had a \$47.5 million outstanding loan amount.

Among the larger transactions, redevelopment and change of use plays featured heavily in sales of retail properties in recent years, and consequently the average transaction price in the first quarter has dropped to \$400/SF.

The San Francisco Bay Area is the global leader in innovation and development of information technology. Home to several of the world's largest companies, including Apple, Alphabet, and Meta, San Francisco and San Jose lead the nation with the highest rates of economic growth at the metropolitan level. The success of Silicon Valley's innovative companies draws the best and brightest graduates to the Bay Area, and this translates into high wages and nation-leading levels of household income growth. As a result, and reflecting limited land availability, San Francisco has some of the nation's highest rents and prices across all real estate asset classes.

However, growth in the technology sector tends to be volatile, with innovation happening in bursts that may deliver high rewards but may also end in over-investment and a downturn in activity. This does not sit well with the slow-moving world of real estate, where buildings take many years to develop and are very difficult to repurpose. Thus, San Francisco's real estate markets have a long history of boom followed by bust, with rents and prices soaring and vacancy falling during the boom periods, and the reverse happening during the busts.

The current boom-bust cycle began with the tech boom of the 2010s, which comprised a massive expansion of cloud computing and mobile technologies. San Francisco was the hub for many of the leading companies that built global businesses around mobile applications that disrupted traditional industries. Real estate demand surged, prompting nation-leading rates of growth in rents and prices and an uptick in construction of office and residential towers in downtown San Francisco.

The cycle abruptly turned downwards in early 2020. By that time, affordability had become a problem, causing both businesses and people to relocate from San Francisco to less expensive parts of the country. The

COVID-19 pandemic and associated lockdowns triggered a surge in this exodus. Tech companies quickly adapted to the distributed workforce model, and employees left the city in large numbers. While the outward migration has now abated, San Francisco's resident population has yet to recover from the tens of thousands of people who moved away.

Starting in 2022, cyclical economic pressures have also been at work, after the Fed raised interest rates to quell inflation by slowing the economy. Locally, the most visible impacts have been layoffs in the tech sector and a large decline in real estate investment sales activity.

The largest impact of the current downturn has been felt by the office sector, which now has record levels of vacancy. Downtown San Francisco has suffered the most, where the exodus of tech workers is part of a broader narrative that involves population decline and an increase in crime, homelessness, and drug abuse. The combination of low levels of economic activity and social problems has impacted the viability of businesses such as retailers, restaurants, and hotels. As these businesses fail, the city's viability falls further, playing out what has been referred to as a "Doom Loop" scenario.

Total employment is now slightly ahead of where it was pre-pandemic. However, with the increase in flexible working practices, it is unclear how many of those employed by San Francisco businesses are living in the metro area. After falling to a 10-year low of 2.3% in 2022, the unemployment rate has since increased to 2.9%.

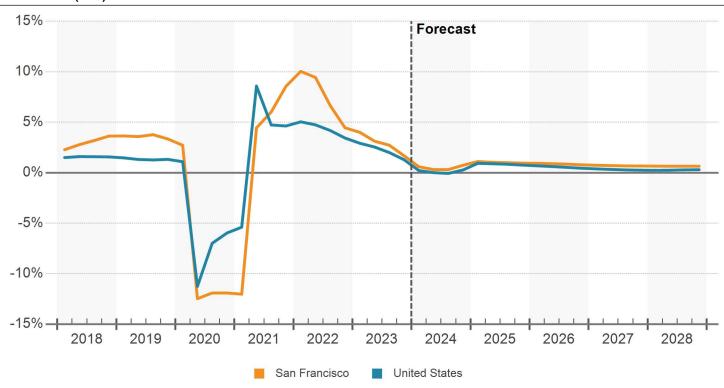

While the current downturn has yet to play out, the longer-term outlook is more positive. Future tech growth in new areas such as AI is expected to remain focused in the Bay Area, as is evident by an increase in leasing activity by AI companies in the past few months.
